USLS-IS BATCH 2003 · 25TH ALUMNI HOMECOMING · DECEMBER 16, 2028

The Golden Batch

PAYMENT SYSTEM FLOW
Receipt-to-Ledger Process
Committee Reference · February 2026

How the Payment System Works

This document explains how payments flow through the system — from the batchmate's profile to the accounting ledger. The goal is transparency for the batchmate and control for the financial controllers. No payment data is auto-generated. Controllers enter all financial details manually. The system's job is to deliver receipts to the right place so no one is chasing screenshots.

BATCHMATE SIDE

What They Experience

This is what the batchmate sees and does from their profile page after choosing a contribution tier.

1. **Choose a tier**
   From their profile, the batchmate selects their contribution tier (Platinum, Gold, Silver, or Flex). They can change this anytime — upgrade or downgrade. It's where they're starting, not where they're stuck.
2. **See payment options**
   Payment channels are displayed (bank transfer, e-wallet, etc.) with the account details they need to send money to.
3. **Make payment**
   The batchmate pays through their preferred channel on their own — outside the website. This step happens in their banking app, not on our site.
4. **Upload receipt(s)**
   Back on their profile, they upload a photo or screenshot of their receipt. They can upload multiple receipts at once (e.g., 3 months of installments). The site handles storage.
5. **See their payment history**
   Their profile shows every receipt they've uploaded — timestamped, with verification status (Pending or Verified). This becomes their personal archive. Monthly contributors can scroll back through their full history.

From the batchmate's perspective: choose tier, pay, upload receipt, done. Everything after that happens on the admin side. They just check back to see their progress.

CONTROLLER SIDE

What the Admin Sees

Financial controllers manage everything from the admin dashboard. Two key areas: the Receipts Inbox and the Accounting Ledger.

Receipts Inbox

A new tab in the admin dashboard. This is where all uploaded receipts from batchmates land — one central place.

What's shown	Batchmate name, date uploaded, receipt image thumbnail, status
Statuses	New (just uploaded, unprocessed) and Processed (added to ledger)
Multiple uploads	If a batchmate uploads 3 receipts, all 3 appear as separate entries in the inbox
Purpose	No more chasing receipts through group chats or DMs. Everything is in one place, organized.

The "Add to Ledger" Process

When the controller is ready to process a receipt, here's what happens:

1. **Controller opens a receipt from the inbox**
   They see the full receipt image, who uploaded it, and when.
2. **Clicks "Add to Ledger"**
